```

The screenshot shows a Kali Linux terminal window titled "kali-linux-2023.4-vmware-amd64 - VMware Workstation 17 Player (Non-commercial use only)". The terminal displays Hadoop logs for a job execution. The logs show multiple "Retrying connect to server" messages from the Hadoop client to the namenode, indicating a connection issue. The job eventually completes with a "Success" status, and the final application status is "SUCCEEDED". The logs also show the job's progress and the final output location.

```
